

Bots for everyone: a business built to scale

Heybotify turns automation into a product people can buy in one click: reviews that attract buyers, ready-made bot ideas that convert them, and maintenance plans that keep them paying every month.

LIVE TRACTION

Real numbers, updated automatically

Straight from our servers, no estimates. Launched on **2026-10-24**.

The opportunity

Every person and every small business repeats the same tasks every day: reminders, bookings, invoices, reports, follow-ups, trading rules. AI and automation tools can do all of it, but most people do not know which tool to pick or how to connect them. They want the result, not another platform.

How we make money

1. Custom bots (one-time)

Starter Bot	€99	One job, done every day without you
Pro Assistant	€349	A smart assistant connected to your tools
Trading Bot	€490	Your strategy, coded and tested
Business Suite	Custom	Several bots and workflows for your company

2. Maintenance (recurring)

	SINGLE MONTH	SUBSCRIPTION
Starter Bot	€5	€4/month
Pro Assistant	€12	€9.60/month
Trading Bot	€15	€12/month
Business Suite	€29	€23.20/month

- ✓ **Free acquisition engine:** 50+ independent tool reviews and 40+ bot ideas bring visitors who are already looking for a solution, in English and Spanish.
- ✓ **Try before you buy:** a live demo bot on the website and on Telegram turns curiosity into quote requests.
- ✓ **Viral loop:** every client can refer friends for a €50 credit, and launch offers lower the first-purchase barrier.
- ✓ **Lean operations:** an AI-assisted daily routine maintains the content and checks every link and page, with human approval for anything important.

Two brands, one engine

Heybotify and TradeBot Check share reviews, technology and team: one covers every kind of bot, the other specialises in trading and market statistics. More niche brands can be launched on the same engine at almost no cost.

Roadmap

- **Now:** two live websites in two languages, live demo bot, custom bot packs, maintenance plans, referral programme.
- **Next:** online payments, first client case studies, AI conversations in the demo bot, app in Google Play.
- **Later:** ready-made bot templates marketplace, client dashboard, partner programme for agencies, more languages.
